mamymanjakamanana32@gmail.com|Jakarta, Indonesia (UTC+7)

SUMMARY

Full-stack developer and Computer Science student at BINUS University, originally from Madagascar. Builds and ships production web products end to end — data model, API, interface and deployment — with Laravel, React, Next.js and TypeScript. Hands-on experience in conversion work: A/B-tested landing pages, accurate analytics tracking, Core Web Vitals optimisation and automated CI/CD releases. Open to remote roles and freelance projects.

PROFESSIONAL EXPERIENCE

PBM Agency, Web Development Intern **2026**

- Optimised client websites (Fullbright Indonesia, Next Level, Hariyanto Chung Courses) for performance, UX and conversion rate.
- Built and maintained landing pages with Laravel, React (Inertia.js), TypeScript and Tailwind CSS.
- Ran A/B tests by deploying landing page variants, with traffic split and routed through Cloudflare Workers.
- Integrated analytics and tracking: Meta Pixel, Microsoft Clarity and custom event tracking.
- Improved Core Web Vitals through asset optimisation and deferred script loading; automated releases with GitHub Actions overSSH to Linux servers.

JFC Fashion, Full-Stack E-Commerce Developer — jfcfashion.com **2026**

- Developed a full fashion e-commerce platform on Laravel and Bagisto, from catalogue to paid, shipped order.
- Implemented the Vue.js storefront with product, cart, checkout and order workflows.
- Integrated Duitku payment gateway and built a custom Biteship integration for live shipping rates and delivery.
- Configured and deployed the application on a production VPS.

Freelance Web Developer & Open Source Contributor **2025 - Present**

- Built responsive web applications and landing pages with React, Next.js, Laravel and PostgreSQL.
- Maintained Git-based workflows and continuously improved front-end performance and user experience.
